SUMMARY

I'm a student seeking a Junior Developer role with a strong focus on ASP.NET Core. I started with the MERN stack, but for the past year, I've worked mainly in .NET, including a production-level internship at Crystal Solutions using Clean Code architecture. I've also built a React Native app (KrishiSanchar), and I'm comfortable with SQL/NoSQL, Git, and team collaboration. I've hosted several projects, including my portfolio, and hold an averaging 3.0 GPA academically .
